### **DETAILED ACTION**

1) Acknowledgement is made of Amendment received 3/7/2007.

Claim 62 is amended.

#### Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2) Claim 62 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 62 is a non-statutory claim since it includes the **USE** and the **METHOD OF MAKING** of recycled calcium carbonate. Claims 62 part "A use of recycled calcium carbonate in the treatment of a paper, board or nonwoven product, comprising: treating the paper, board, or nonwoven product with the recycled calcium carbonate," pertains to the use of recycled calcium carbonate. Claim 62 part "the recycled calcium carbonate being prepared by calcining into Ilme precipitated calcium carbonate residue of a deinking process of recycled fiber of the paper, board or non-woven product; reacting the lime with water to form calcium hydroxide; and reacting the calcium hydroxide with carbon dioxide to form the recycled calcium carbonate." pertains to the method of making recycled calcium carbonate.

Art Unit: 1731

# Claim Rejections - 35 USC § 102

Page 3

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- 3) Claim 62 is rejected under 35 U.S.C. 102(b) as being anticipated by Sohara (5,759,258). Sohara discloses the forming of calcium carbonate from residues of deinking of wastepaper process, as shown in Figure 1. The formed recycled calcium carbonate also known as precipitated calcium carbonate (PCC) is used for treatment of paper, for example, to provide high brightness to the paper as disclosed in Example I (cols. 6-7).

# Response to Amendment

- 4) Claim 62 rejection under 35 U.S.C. 101, is withdrawn in view of amended claim.
- 5) Claim 62 rejection under 35 U.S.C. 112, second paragraph, is withdrawn in view of amended claim.
- 6) Applicant's arguments filed 3/7/2007, have been fully considered but they are not persuasive.

Applicant traverses the restriction of previous Office Action.

As indicated in the previous Office Action, newly submitted claims 63, 64, are directed to an invention that is independent or distinct from the invention originally

claimed for the following reasons: Claim 63 recites a method of treating a paper. Claim 64 recites a method of making recycled calcium carbonate.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 63, 64, are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

The requirement is deemed proper and is therefore made FINAL.

In regard to claim 62, Applicant alleges that the cited prior art, Sahara, does not disclose "calcining into lime precipitated calcium carbonate residue of a deinking process of recycled fiber of the paper, board or non-woven product".

Claim 62 part "the recycled calcium carbonate being prepared by calcining into lime precipitated calcium carbonate residue of a deinking process of recycled fiber of the paper, board or non-woven product" pertains to the method of making the recycled calcium carbonate and does not pertain to the use of the recycled calcium carbonate. Claims 62 part "A use of recycled calcium carbonate in the treatment of a paper, board or nonwoven product, comprising; treating the paper, board, or nonwoven product with the recycled calcium carbonate," pertains to the use of recycled calcium carbonate. Sohara discloses recycled calcium carbonate, also known as precipitated calcium carbonate (PCC), is used for treatment of paper, for example, to provide high brightness to the paper as disclosed in Example I, regardless as to how the recycled calcium carbonate is formed.

Art Unit: 1731

#### Conclusion

7) Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Halpern whose telephone number is 571-272-1190. The examiner can normally be reached on Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steven Griffin can be reached on 571-272-1189. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
